Draw a line to the correct answer.

## Baitcasting

The revolving or level wind spool is used for baitcasting tackle. Generally this type of reel is used with heavier baits or lures and is most often used by bass fisherman.

## Spinning

A greater variety of rods and reels are available in spinning tackle. This is probably the most widely used gear for all types of freshwater and saltwater fishing.

## Spin Casting

Perhaps the easiest tackle to learn to cast and fish with. Spincast gear is fine for most freshwater fishing and is quite affordable.
